Practical Orthopaedics for General Practitioner

INTRODUCTION

This is a practical course for the general practitioner designed to enhance Orthopaedics skills in a primary care setting.

This course gives a practical approach to the management of common orthopaedic disorders seen at the General practitioner's Office. The course also offers a hands on training to develop skills to address some of these conditions.

Topics are arranged to address the aetiology, clinical features and management of these conditions.

A short revision of the anatomy and surface anatomy is demonstrated preceding each module.

Module I :

Introduces the participants to Repetitive Stress Injuries and the principles of soft tissue injections.

Module II :

Addresses common upper limb disorders like carpal tunnel syndrome, trigger finger, Dequervain's tenosynovitis, ganglions and shoulder impingement syndrome.

Module III :

Practical management of common lower limb disorders like osteoarthritis of the knee, planter Fasciitis and ingrown toenails.

Modules IV :

Covers basic understanding of common sports injuries.

Module V :

Common splinting techniques for common sport injuries and their basic management.

Workshop on practical injection techniques will also be held. All the modules will be enhanced in a prepared graphic CD with pictures & demonstration of anatomy, surface markings and injection techniques.

Each candidate will take back a CD worth RM200.00 which is part of the course material.

For Registration Contact :

Ms Mala / Mr Mathan
Tel: 03-8993 9176/9177
Email: mala@afpm.org.my
mathan@afpm.org.my
